INDEX TO VOLUME XVI

ACKERBERG, R. C., *see* LEIBOWITZ, M. A.

ASHWELL, D. G. On the Deformation of Flat Plates into Cones . . 163

——— The Boundary Layer in the Bending of Inextensible Plates and Shells 179

BARTLETT, C. C. The Vibration and Buckling of a Circular Plate Clamped on Part of its Boundary and Simply Supported on the Remainder . 431

BARUA, S. N. On Secondary Flow in Stationary Curved Pipes . . 61

BENTHEM, J. P. A Laplace Transform Method for the Solution of Semi-Infinite and Finite Strip Problems in Stress Analysis . . . 413

BHATNAGAR, P. L., and RATHNA, S. L. Flow of a Fluid between Two Rotating Coaxial Cones having the Same Vertex 329

BUCHWALD, V. T., and DAVIS, A. Surface Waves in Elastic Media with Cubic Symmetry 283

CAMERON, I. G. The Attenuation of Hydromagnetic Shock Waves in a Shock Tube 363

CICALA, P. Thin Shells under Assigned Body and Contour Forces . 93

COOKE, J. C. Triple Integral Equations 193

COWLING, T. G., *see* SINGH, K. R.

CRYER, C. W. A Comparison of the Three-Dimensional Consolidation Theories of Biot and Terzaghi 401

DAVEY, A. Rotational Flow near a Forward Stagnation Point . . 33

DAVIS, A., *see* BUCHWALD, V. T.

DOLLIMORE, J. The Transformation for an Arbitrary Hole in an Infinite Plate of Elastic Material 149

FLAVIN, J. N. Surface Waves in Pre-stressed Mooney Material . . 441

FLORENCE, A. L., *see* GOODIER, J. N.

GIBSON, R. E., and MCNAMEE, J. A Three-Dimensional Problem of the Consolidation of a Semi-Infinite Clay Stratum 115

GOLDENBERG, H. Derivation of Three-Dimensional from Two-Dimensional Solutions of Transient Heat Conduction Problems . . 483

GOODIER, J. N., and FLORENCE, A. L. Thermal Stresses at an Insulated Circular Hole near the Edge of an Insulated Plate under Uniform Heat Flow 273

HEWSON-BROWNE, R. C. The Oscillation of a Thick Aerofoil in an Incompressible Flow 79

HOLT, M., and LEE, S. C. The Flow of Two Adjacent Plane Supersonic Jets past Flat Plate Wings IV 223

JANA, R. N. Deformation in an Infinite Poroelastic Medium with a Long Circular Cylindrical Hole 137

JONES, J. G., *see* MOORE, K. C.

KNOPS, R. J. Two-Dimensional Electrostriction 377

LANCASTER, P. On Regular Pencils of Matrices arising in the Theory of Vibrations 253

LEE, S. C., *see* HOLT, M.

LEIBOWITZ, M. A., and ACKERBERG, R. C. The Vibration of a Conducting Wire in a Magnetic Field 507

MACFARLANE, A. G. J. The Calculation of Functionals of the Time and Frequency Response of a Linear Constant Coefficient Dynamical System 259

MCNAMEE, J., *see* GIBSON, R. E.

MOORE, K. C., and JONES, J. G. Quasi-Cylindrical Surfaces with Prescribed Thickness Distributions 521

MORLEY, L. S. D. Simple Series Solution for the Bending of a Clamped Rectangular Plate under Uniform Normal Load 109

——— Corrigendum 271

——— Variational Reduction of the Clamped Plate to Two Successive Membrane Problems with an Application to Uniformly Loaded Sectors 451

NAG, K. R. Generation of 'SH' Type of Waves due to Stress-Discontinuity in a Layered Medium 295

NARIBOLI, G. A., and NYAYADHISH, V. B. One-Dimensional Thermo-Elastic Wave 473

NORTON, H. J. A Note on the Errors in the Measurement of High Impulse Voltages using a Resistor Divider 389

NYAYADHISH, V. B., *see* NARIBOLI, G. A.

PAN, H. H. Author's Note 304

RATHNA, S. L., *see* BHATNAGAR, P. L.

SHIVAKUMAR, P. N. Dislocations in Isotropic Cylinders of Eccentric Circular Cross-sections 129

SINGH, K. R., and COWLING, T. G. Thermal Convection in Magnetohydrodynamics. I. Boundary Layer Flow up a Hot Vertical Plate 1

—— —— Thermal Convection in Magnetohydrodynamics. II. Flow in a Rectangular Box 17

SMITH, M. G. An Approximate Solution of the Spherically Symmetric Transport Equation 239

STORER, R. J. The Flow of Two Adjacent Plane Supersonic Jets past Flat-Plate Wings III 305

WALTERS, T. S. Diffusion into a Turbulent Atmosphere from a Semi-Infinite Evaporating Area 357

WARSI, Z. U. A. Boundary Layer Growth on a Sphere 347

WILLIAMS, W. E. Note on the Electrostatic Problem for a Circular Annulus 205

WOODS, L. C. On the Influence of a Uniform Current on the Velocity of Hydromagnetic Waves 209
